

RAFIA JAHANGIR ABBASI

SOFTWARE DEVELOPER | MOBILE APP DEVELOPER

PROFILE

Motivated Software Engineering graduate with a strong interest in Artificial Intelligence, Machine Learning, Computer Vision, Natural Language Processing, and Multimodal AI. Experienced in developing AI-driven applications involving Large Language Models (LLMs), computer vision, and intelligent decision-support systems. Passionate about building multimodal intelligent agents that can perceive, reason, and continuously learn from complex environments. Seeking to contribute to cutting-edge research in vision-language models, continual learning, embodied AI, and efficient machine learning systems through graduate research.

RESEARCH INTEREST

My research interests lie in Multimodal AI, Computer Vision, Natural Language Processing, and Continual Learning. I am particularly interested in developing vision-language models and intelligent agents that can integrate perception, reasoning, and adaptive learning for real-world applications.

WORK EXPERIENCE

Selltime 2024 - continue

Graphic Designer

- Delivered lessons in science and computer subjects, improving student understanding and
- participation.
- Enhanced digital literacy through practical computer-based sessions.

New Saddique Public School 2022 - 2024

Teacher

- Delivered lessons in science and computer subjects, improving student understanding and
- participation.
- Enhanced digital literacy through practical computer-based sessions.

EDUCATION

Bachelor of Software Engineering (BSSE) 2022 - 2026

PMAS Arid Agriculture University

GPA: 3.79 / 4.0

F.Sc. Pre-Engineering 2018- 2020

Punjab Group of Colleges

MARKS:835/1100

CONTACT

+92 332 5898524

4A, A BLOCK
RAWALPINDI

SKILLS

- Python
- Java
- SQL
- Machine Learning & AI:
- PyTorch
- Machine Learning
- Deep Learning Fundamentals
- Computer Vision
- Natural Language Processing
- Large Language Models (LLMs)
- Frameworks:
- Flask
- Flutter
- REST APIs
- Git
- GitHub
- Flutter (DART)
- RESTFUL APIs
- JavaScript.
- HTML, CSS.

CONFERENCE & VOLUNTEER

- IT Expo 2025,
- Creative Leadership Conference (CLC)
- Seniorgraphic Designer – Aridian House of Art Society

AWARDS & ACHIEVEMENTS

- NSCT PASSED -(HEC)
- VC Talent Scholarship Winner,
- PM Laptop Scheme Recipient,
- 2nd Position – Flutter App Development

CERTIFICATES

Claude 101 , Claude Code 101 & AI Fluency Anthropic courses	2026
Deloitte Deloitte Technology job Stimulation	2026
National Skill Competency Test Higher Education Pakistan	2026
Flutter App Development PMAS Arid Agriculture University 2 nd Position	2025
Web Development Udemy	2024
Graphic Designig PMAS Arid Agriculture University	2023
DataBase Basics DBWALA	2023

AI & RESEARCH PROJECTS

• AI Chatbot

A full-stack AI chatbot with Flutter frontend and Flask backend.
Technologies : llama,Mysql,Flutter, Github
Chat with an AI assistant powered by Groq (llama-3.3-70b-versatile)
Web search with multi-source verification
Memory: remembers user facts/preferences across sessions
Tool calling: Calculator, Weather, Currency converter, Date/Time, Web Search, Document reader
Attachments: images and files with text extraction

https://github.com/Rafiaa01/AI_Chartbot

• Verti Nutrient System

Technologies: Flutter, Dart, Firebase,Github,Yolo,Flask
• Designed and developed a mobile application and AI model for nutrient management and monitoring
. • Implemented responsive UI and database integration.
• Improved user accessibility through a mobile-first approach.

https://github.com/Rafiaa01/nutri_sense

RESEARCH EXPERIENCE

- Independent AI Research Projects:
- LLM-Powered Resume Screening System
- Computer Vision for Plant Disease Detection

Plant Disease Detection :

Technologies: Python, Machine Learning, Flutter ,Flask

- Developed an AI-powered application for detecting plant diseases using machine learning techniques.
- Integrated image processing and predictive models for disease identification.
- Focused on improving agricultural decision-making through intelligent automation.

<https://github.com/Rafiaa01/rafiapython>

• Translation Tool

Technologies: HTML, CSS, JavaScript, Translation API, GitHub

- Developed a web-based translation tool capable of translating text between multiple languages.
- Designed a responsive and user-friendly interface for seamless user interaction.
- Integrated translation APIs to provide real-time language translation.
- Deployed the application using GitHub Pages for public access.

LiveDemo:

https://rafiaa01.github.io/rafiapython/translation_tool.html

GitHub: <https://github.com/Rafiaa01/rafiapython>

• Smart File Organizer

Technologies: Python, Flask, HTML, CSS, JavaScript

- Developed a web-based file management system to organize and categorize files efficiently.
- Implemented file upload, sorting, and management functionalities through a user-friendly interface.
- Designed responsive web pages using HTML, CSS, and JavaScript.
- Built and deployed the application using Flask and PythonAnywhere.

Live Demo: <https://rafiaaa.pythonanywhere.com/>

Future Project

LLM-Powered Resume Screening and Ranking System

- Developing an intelligent recruitment system using Large Language Models.
- Applying semantic similarity and transformer-based embeddings for candidate-job matching.
- Exploring explainable AI techniques for transparent hiring recommendations.
- Technologies: Python, LLaMA, Hugging Face Transformers, Flask, PostgreSQL.
